DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith '210' in view of either Rehmer, Forsyth or Reynolds. Smith '210 discloses the basic apparatus except for the use of fans adjacent the waste reducing tool, resulting in poor material flow. Each of the secondary references solves this problem by disclosing similar apparatus including the use of fan blades adjacent the tool; see 33 of Rehmer, 16 of Forsyth, and 60,61 of Reynolds. Therefore, in order to promote better material flow, it would have been obvious for one of ordinary skill in the art to modify Smith '210 by providing fan blades adjacent the waste processing tool, taught to be desirable by each of the secondary references. Any limitations not met by this combination of references are held to be design choices only as they solve no stated problems.
